Part No. ZUN26210B (860x63mm) (33.8x2.5in)

Part No. ZUN26310B (1200x110mm) (47.25x4.3in)

Part No. Custom Sizes Are Available

BLACK POLYMER COATED STAINLESS STEEL WIRE MESH BLANKS

Material & Finish Specification

The mesh that you have purchased has been manufactured from high quality stainless steel wire mesh that complies to British Standard BS-EN 10088-1, X2CrNiMo17-12-2, (304 Equiv.) and accurately woven to achieve a uniform pattern.

The polymer coating (ES Black 710 MAC) provides a semi gloss black finish which has been tested for a series of conditions such as coating adhesion, stone chip resistance, resistance to salt, resistance to fuel, water immersion, humidity conforming to stringent automotive standards.

Appearance & Protection

The mesh has a typical mesh aperture of 6.8 mm, prior to coating, and has been cut and supplied to give a “diamond appearance” when fitted to the vehicle, this minimizes any waste and gives it a real “sporty look”.

The mesh when fitted to a grille aperture will provide protection to intercoolers and radiators from chippings, leaves and other road debris.

Take Care

The extreme edges of the mesh may be sharp and it is recommended that suitable gloves are worn when handling and working. Eye protection is advised when cutting the mesh.

Mesh Blank Stability

The extreme edges of the mesh blank have been resistance welded to retain the original pattern during subsequent processing, the polymer coating retains the mesh pattern permanently and the mesh can be cut to your required shape or size without consideration to change of pattern.

Fitting to Vehicle

The material can be cut with a good pair of side cutters or other suitable tools; take care not to damage the wire or coating.

Suitable fixings and adhesives can be purchased to secure the mesh for your personal application, we have experience of using a structural adhesive that provides excellent adhesion on clean surfaces, (PC 85 Adhesive).

Any Queries?

If you have any queries on your purchase our Technical Services will be pleased to provide assistance. E-Mail to info@zunsport.co.uk or telephone 0300 3032605.

THANK YOU FOR CHOOSING A ZUNSPORT PRODUCT.
